Full Name: _____	
Signature: _____	Date: _____

CONDITIONS

This application will only be processed when all relevant sections of this form have been completed, and all requested documentation provided. Failure to do so will result in a delayed approval.

- It is the Applicant's responsibility to ensure that all hazardous/regulated waste is handled and disposed of in a safe and legal manner.
- Hazardous/regulated waste is accepted for disposal between 8.00 am and 3.00 pm, Monday to Friday at Trap Gully Landfill only. (**minimum three (3) business days' notice of disposal**)
- Material containing heavy metals, hydrocarbons, chemicals or contaminants may require analysis and a Toxicity Characteristic Leaching Procedure test may need to be provided to Council.
- An SDS may need to be provided to Council.
- The *Environmental Protection Act 1994*, requires regulated waste that is transported commercially or in quantities of more than 250 kg (175 kg limit for asbestos) in a load, to be carted by approved/licensed 'Regulated Waste Transporters' only. Details must be provided.
- Regulated waste transport certificates must be completed in accordance with the Act.
- Drivers of all waste transport vehicles (commercial/private) must obtain direction and comply with all directions from the weighbridge operator at the landfill for the placement of the material. The 'Acceptance Notification Number' (at end of form) will be provided by Council prior to accepting disposal.
- Please notify Council on 4992 9500, at least 24 hour prior to the disposal date for any cancellations/rescheduling.

Asbestos:

See www.asbestos.qld.gov.au for all required information in handling asbestos. State legislation requires a Class A Asbestos Licence for the removal of friable asbestos, and a Class B Asbestos Licence for the removal of more than 10 m² of bonded asbestos. A licenced transporter is required for wrapped quantities over 175 kg.

As a minimum:

- 1) Asbestos sheeting is to be wetted, wrapped and sealed in two layers of heavy-duty, minimum of 0.2 mm plastic sheeting in quantities able to be handled by the person disposing of the waste and sufficiently sealed to prevent dust emissions. Any loads not found to have complied with this requirement may have their load rejected.
- 2) The packaging/bag is marked in contrasting colours with the warning "CAUTION - Contains Asbestos Material, Do Not Damage or Open Bag, Do Not Inhale Dust," and the lettering no less than 20 mm.
- 3) The material is to be unloaded with due care using a tipper truck/trailer or by hand so that the plastic wrapping/lining is not damaged.
- 4) Material is to be neatly and tidily placed at the identified location to be covered. It is the responsibility of the transporter to ensure they have the necessary equipment to place material in the asbestos landfill.

ORIGIN OF WASTE	Lot:	Plan:
	Street Address:	
	Current Land Use:	
	EA Permit Number (if applicable):	
	Description of waste:	
	Quantity (m², m³, L, kg, t):	
	Is this material identified as a Regulated Waste under Schedule 9 of the Environmental Protection Regulation 2008? <input type="checkbox"/> YES <input type="checkbox"/> NO	
DISPOSAL DETAILS	Hazardous/regulated waste is accepted for disposal between 8.00 am and 3.00 pm, Monday to Friday at Trap Gully Landfill only. (minimum three (3) business days' notice of disposal)	
	Preferred disposal date:_____ Preferred disposal time:_____	
	Regulated Waste Transporter name (if applicable):_____
